### **November 2008**

Australian Author Dana Mrkich is certainly in tune with the current global mood with the launch of her first book *A New Chapter*. Released in Australia in June by Zeus Publications, it is now available online and in all good bookstores. Dana has drawn from over a decade of professional experience working with clients all over the world as a Soul & Energy Intuitive, and her own extensive personal experiences, and created a work that has been called “a vision of hope in a world gone mad.” (David Rippe, Author of *The Flip – Turn your World Around*). Practical exercises combine with spiritual wisdom and insights into our political and media influences, providing a tool that will guide, inspire and empower you to step into who you really are, and by doing so play your part in creating the best possible new chapter for our world.

*“It is time to merge consciousness with action, and action with consciousness”*

Dana wrote the book to help people understand the massive changes that are sweeping through so many lives right now. “So many of us are experiencing profound, intense shifts in our lives and wondering what is going on as we look around at the major changes going on all around the world. Humanity is right now at a crossroads. A new chapter in our evolution lies before us. Every one of us is a page in this new chapter. Each of us has a part to play in determining what this new chapter looks like. All you have to do to make your page the best it can be is: be your true self. *A New Chapter* is your own personal guidebook showing you the way, inspiring and empowering you to listen to your instincts, feel your feelings and speak your truth. One by one we can do this. The planet and humanity need you!”

Dana is in the US until 12 Dec, having just completed her 13 week *Visioning the Dream Awake* Radio Show Series on Voice America’s 7<sup>th</sup> Wave Network. Thanks to technology she continues to offer her empowering Soul Sessions via Email and Skype Phone/Video.
